《My Encounter with Parkinson's Disease》

《My Encounter with Parkinson's Disease》 represents an admirable and worthy joint effort by both health care professionals and patients with Parkinson's disease. It brings together a series of chapters about patients with Parkinson's disease and health care professionals who care for them. This book gives a great deal of insight into how remarkable patients and their carers cope with this illness over such a long duration. It gives testament to how resilient human nature can be in trying to make the best out of terrible circumstances.
